Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 and 5-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stockdale, U. S. Patent 6,313,223.

Reference to Stockdale teaches the claimed "alloy" insofar as it mixes the same two polymers with the same proportion of polymers as claimed. The reference teaches different ranges for the monomer components of the acrylate/nitrile copolymers, but the ranges overlap leaving the choice of proportions of monomers, specifically the amount of nitrile monomer, obvious to one of ordinary skill in the art. The reference teaches the curing of the combination of polymers using curing agents and the use of the cured product as a hose for internal combustion engines. All of these claims are, therefore, rendered prima facie obvious to one of ordinary skill in the art from the teaching of Stockdale.

3. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The specific content of nitrile monomer in the copolymer B as claimed is neither taught nor rendered prima facie obvious by the closest prior art as cited.
